DETAILED ACTION

- 1. This Office action is in response to Application No. 09/779,954, filed on 02/09/2001.
- 2. Claims 1-19 are pending.

Claim Rejections - 35 USC § 103 (a)

- 3. The following is a quotation of 35 U.S.C. 103 (a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-19 are rejected under 35 U.S.C. 103 (a) as being unpatentable by Clark et al. (U.S.

Pat. No. 5,710,889) in view of Jia et al. (U.S. Pat. No. 5,991,402).

Serial Number: 09/779,954 Page 3

Art Unit: 3621

As per claims 1, 5-7, 9, 10, 12-14, and 16-19 Clark substantially discloses an electronic delivery system that delivering services directly to a customer facility at any time requested by the customer. The customer connects to the system whenever desired to access each of the services, and the interface device stores and routes messages between the customers and each of the service providers at the respective times when the customers' facilities and the service providers' facilities are operative (which is readable as Applicant's claimed invention system for delivering institutional data to a customer), comprising:

an institutional server, wherein the institutional server includes a system for separately serving a first database containing private and a second database containing (see., fig 1, abstract, col 3, lines 18-35, repository and archive facility);

a client, wherein the client includes a system for displaying a merged version of the private and public data (or security) see., figs 15, 17, 20, 23, 24, 28, col 6, lines 37-47, col 14, lines 10-22, col 21, lines 16-25). It is to be noted that Clark fails to explicitly disclose an encrypted version of the private data and an unencrypted version of the public data. However, Jia discloses a method/system that enables software-on-demand and software subscription services based on a dynamic transformation filter. An encrypted material installed on the computer is encrypted by decrypting a first version of the material to produce an unencrypted version (see., abstract, col 5, lines 55-67, col 6, lines 1-67, col 7, lines 1-26, col 10, lines 8-13). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the global financial service of Clark by

Serial Number: 09/779,954

Page 4

Art Unit: 3621

including the limitation detailed above as taught by Jia because such modification would shield direct

access to the financial services.

As per claim 2, Jia discloses the claimed limitations wherein the client includes a mechanism for

decrypting the encrypted private data (see., abstract, col 5, lines 55-67, col 6, lines 1-67, col 7, lines

1-26).

As per claim 3, Jia discloses the claimed limitations wherein said making the customer anonymous

to the service provider (see., abstract, fig 1, item 108).

As per claim 4, Jia discloses the claimed limitations wherein the system for making the customer

anonymous to the service provider includes a mechanism for determining a service level available to

the customer (see., abstract, col 3, lines 20-44).

As per claims 8, 11, and 15 Jia discloses the claimed limitations wherein the encrypted version of the

private data is encrypted using a public key infrastructure protocol (see., col 6, lines 64-67, col 7,

lines 1-18).

Serial Number: 09/779,954

CONCLUSION

5. Any inquiry concerning this communication from the examiner should be directed to Pierre

Eddy Elisca at (703) 305-3987. The examiner can normally be reached on Tuesday to Friday from

6:30AM. to 5:00PM.

If any attempt to reach the examiner by telephone is unsuccessful, the examiner's supervisor,

James Trammell can be reached on (703) 305-9768.

Any response to this action should be mailed to:

Commissioner of patents and Trademarks

Washington, D.C. 20231
